SUMMARY

I am a recent graduate with a passion for programming. I have a foundation in both front-end and back-end development, along with experience from an internship as a front-end developer.

I can work under pressure and manage my time effectively in a professional environment. I am now seeking an opportunity to start my career, where I can apply my skills, knowledge, and experience to develop innovative solutions and contribute to the success of the organization.

PROFESSIONAL EXPERIENCE

Cooperative Education Internship   **1 Nov 2024 - 27 Feb 2025**

- I completed my cooperative education internship at JOS Technology Co., Ltd., where I worked as both a frontend and backend intern. I contributed to the development of a Transportation Management System (TMS). This system is designed to create transport orders and assign tasks to drivers for the movement of goods, as well as calculate the cost for each transport job. The system was developed using React. ts for the frontend and Python for the backend.

Graduation Project   **May 2024 - Jule2024**

- For my senior project, I developed an online clothing store system using Java Spring Boot for the backend and Angular for the frontend. This system allows users to browse products and manage their shopping carts, providing the best shopping experience for users.

Participated in a training program at Code Camp Academy.   **Nov 2023 - Feb 2024**

- In this project, I was involved from the beginning as a full-stack developer. I started by designing the system architecture using draw.io, designing the database with dbdiagram.io, and creating the UX/UI on Figma. For development, I used JavaScript with React (Vite) and Tailwind CSS for the frontend, and Node.js (Express) for the backend, along with Prisma and MySQL as the database.

EDUCATION

Bachelor's Degree in Information Technology   **2021 - 2024**

Rajabhat Maha Sarakham University (RMU)
- Major: Information Technology
- Faculty: Information Technology
- GPA: 3.71

ADDITIONAL INFORMATION

- **Languages:** English (Beginner), Thai (Native)
- **Programming Languages:** JavaScript, TypeScript, Java, Python
- **Frameworks & Libraries:** React.js, Node.js, Spring Boot, Flask, Angular
- **Databases:** MySQL
- **Version Control:** Git, GitHub
